

INTERIOR DESIGN

HKM ADVERTISING, AUCKLAND

ASC Architects completed a fit out of the attic floor of an Auckland waterfront building for an advertising agency whose working environment required a semi-open plan solution.

A large floor area coupled with a restricted budget did not prevent the realisation of the client's desire for an elegant and restrained treatment of the space. Set piece walls and screens, in clear finished timber, and translucent aircraft fabric articulate the space, enabling meeting rooms to be semi-concealed and workspaces to operate fluidly off the reception area.
