

INTERIOR DESIGN

MCDONALD'S MCCAFFEE, NATIONWIDE

ASC Architects worked closely with McDonald's to create the McCafé image now being adapted to restaurants nationwide. The McCafé experience complements the existing restaurants – generally as a distinctly separate dining area within the McDonald's restaurant.

The décor was designed with a sharp contemporary edge, consisting of warm surrounds through the use of natural woods, armchairs, lighting and relaxing music.

The McCafé designs incorporate an easy indoor outdoor flow with the use of bi-folding doors, reflecting New Zealanders' fondness for openness and light.
