

HEALTHCARE

EASTMED PRIMARY CARE CLINIC, AUCKLAND

June 2002 saw the opening of the second primary healthcare clinic for PrimaryMED, called EastMED. It follows the integrated CityMED model, which has been operating successfully for a number of years in Albert Street.

EastMED is on the site of the old Adventist Hospital in St Heliers Bay Rd. A joint venture with Calan Healthcare Properties Trust, it provides rooms for doctors, physiotherapy, laboratory, radiology and pharmacy services in a new and professional quality environment.

In adding to the 1980s' era Adventist building to create the new facility, ASC Architects has introduced a clearer, more modern aesthetic to give a fresh start to the new operation.
