

RESIDENTIAL

ALPHA APARTMENTS, AUCKLAND

Completed in 2004, this 17 level steel and concrete apartment tower provides 113 freehold one, two and three bedroom apartments plus four penthouse units on the upper levels. Three levels of basement parking are also provided. There are 32 different apartment configurations that cater to most needs. All apartments include balconies or decks to afford views of the nearby Sky Tower, Viaduct Harbour and Harbour Bridge.

The building structure consists of a steel frame and pre-cast concrete panels with pre-cast concrete wall panels, Eterpan VentClad System and vertical Colorsteel cladding. The penthouse levels feature aluminium composite panels to walls and soffits.

This strikingly simple, modern and elegant building sets a new design standard for central Auckland apartment buildings.
